

models\Localisation  
\delete

models\Localisation  
\update

models\Localisation  
\getLocalisationId

```
graph LR; A[models\Localisation\delete] --> C[models\Localisation\getLocalisationId]; B[models\Localisation\update] --> C;
```

The diagram illustrates a mapping or dependency. On the left, there are two separate boxes: the top one contains 'models\Localisation\delete' and the bottom one contains 'models\Localisation\update'. On the right, there is a single, shaded box containing 'models\Localisation\getLocalisationId'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the shaded box, indicating that both the delete and update operations are associated with or depend on the getLocalisationId function.
