

controllers\rest\AlertRest
Controller\createItem

controllers\rest\AlertRest
Controller\updateItem

controllers\rest\AlertRest
Controller_findAdeCodes

```
graph LR; A["controllers\rest\AlertRest  
Controller\createItem"] --> C["controllers\rest\AlertRest  
Controller\_findAdeCodes"]; B["controllers\rest\AlertRest  
Controller\updateItem"] --> C;
```

The diagram illustrates a dependency or mapping relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'controllers\rest\AlertRest Controller\createItem' and the bottom box contains 'controllers\rest\AlertRest Controller\updateItem'. On the right, there is a single gray rectangular box with a black border containing the text 'controllers\rest\AlertRest Controller_findAdeCodes'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'createItem' and 'updateItem' methods depend on or map to the '_findAdeCodes' method.
