

models\Information
\insert

models\Information
\update

models\Information
\getDuration

```
graph LR; A[models\Information<br/>\insert] --> C[models\Information<br/>\getDuration]; B[models\Information<br/>\update] --> C;
```

The diagram illustrates a data flow or dependency. On the left, there are two separate boxes. The top box contains the text 'models\Information' followed by '\insert' on a new line. The bottom box contains 'models\Information' followed by '\update' on a new line. Both of these boxes have a blue arrow pointing from their right side to a single box on the right. This box on the right is shaded gray and contains the text 'models\Information' followed by '\getDuration' on a new line. The arrows indicate that both the '\insert' and '\update' operations are related to or depend on the '\getDuration' operation.
