

controllers\rest\UserRest
Controller\create_item

controllers\rest\UserRest
Controller\update_item

controllers\rest\UserRest
Controller\find_ade_codes

```
graph LR; A["controllers\rest\UserRest Controller\create_item"] --> C["controllers\rest\UserRest Controller\find_ade_codes"]; B["controllers\rest\UserRest Controller\update_item"] --> C;
```

The diagram illustrates a mapping or dependency relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'controllers\rest\UserRest Controller\create_item' and the bottom box contains 'controllers\rest\UserRest Controller\update_item'. On the right, there is a single gray rectangular box with a black border containing the text 'controllers\rest\UserRest Controller\find_ade_codes'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'create_item' and 'update_item' methods depend on or map to the 'find_ade_codes' method.
